Assembling Primes

Problem author: Paul Wild

A

- You are given a non-empty set of (decimal) digits.
- Construct a prime number that uses exactly those digits.
- Report "`impossible`" if no such prime number exists.
- Digits can be reused, but each digit needs to be used at least once.

`2 3 4 5 8 9` ⇝ `998244353`

`1` ⇝ `11`

`5` ⇝ `5`

`3 6` ⇝ `impossible`

`0 1 2 3 4 5 6 7 8 9` ⇝ `509118392752643`
